

To our valued supplier:

United Natural Foods has selected Distribution 2000, Inc. as our preferred pick up point for suppliers needing warehousing and transportation services in the Mid-West. While our suppliers all have different storage needs Distribution 2000 has developed preferred pricing for all UNFI suppliers. In addition, if your terms are FOB Distribution 2000, UNFI will be able to leverage the existing volume shipping to UNFI locations across the country.

Distribution 2000 is an asset based 3rd party logistics provider offering warehousing and transportation services in the Chicago metropolitan area. They are located just 30 miles southwest of downtown Chicago and are ideally situated to serve as either a Midwest Regional Distribution Center or as a National Distribution Center.

Distribution 2000 has a deep level of experience and maintains a core capability handling fast moving consumer packaged goods with a concentration on specialty dry grocery products.

United Natural Foods and Distribution 2000 have been working together for nearly 10 years as UNFI existing suppliers at Distribution 2000 have helped build a strategic relationship.

Distribution 2000 is FDA registered and organic certified as an organic product handler (OH) by Oregon Tilth.

Distribution 2000 has just finalized plans to relocate and expand their Chicago area warehouse operations in the spring of 2012.

Please don't hesitate to reach out to Sal on storage questions and pricing.

Thank you,

**Christopher Erklenz**
